PROFESSIONAL SUMMARY

Data Scientist and AI Engineer with an MCA background and hands-on experience in data analytics, SQL, Python, machine learning, Generative AI, NLP, and enterprise data pipelines. Experienced in analyzing and validating large-scale business data, developing SQL-based analytics solutions, performing exploratory data analysis, and building machine learning applications. Skilled in transforming complex datasets into actionable insights and developing scalable, data-driven solutions using Python, SQL, Pandas, Scikit-Learn, and modern AI technologies. Seeking opportunities in Data Analytics, Data Science, Machine Learning, and AI Engineering.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, Advanced SQL, Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA)

Data Science & Machine Learning: Supervised Learning, Feature Engineering, Feature Selection, Model Training, Model Tuning, Model Validation, Classification

Generative AI & NLP: Generative AI, Prompt Engineering, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), Transformer Models, OpenAI and Open-Source LLM Integration

Data Visualization: Power BI, Excel, Matplotlib, Seaborn, Plotly

Machine Learning & AI Libraries: Scikit-Learn, OpenCV, Librosa

Databases & Engineering: Relational Databases, DBMS, Data Pipeline Validation, Data Quality, Data Integration, Cloud Computing Fundamentals

PROFESSIONAL EXPERIENCE

Jr. Technical Engineer

BizzCat Tech Solutions and Services Pvt. Ltd. | Ahmedabad, India | Apr 2023 – Present

- Managed and validated large-scale enterprise datasets covering payroll, attendance, and employee master records for uKnowva HRMS implementations.
- Developed and optimized SQL queries and data extraction scripts to transform transactional data into meaningful business insights and reporting outputs.
- Performed data cleaning, validation, reconciliation, and quality checks to identify inconsistencies across enterprise HR datasets and system integrations.
- Designed and executed manual testing and data pipeline validation for system configurations and integrations, helping reduce data-related implementation issues.
- Supported client implementations by analyzing data migration requirements, validating transformed datasets, and troubleshooting data inconsistencies.
- Created technical documentation covering data workflows, system configurations, validation procedures, and implementation processes.
- Collaborated with technical and business teams to resolve data-related issues and improve the reliability of enterprise HRMS deployments.

TECHNICAL PROJECTS

HR Data Analytics

Python | SQL | Pandas | Excel | Power BI

- Analyzed employee datasets to identify trends in attrition, salary, performance, job satisfaction, demographics, and department-wise workforce distribution.
- Cleaned and transformed HR datasets using Python and Pandas, handling missing values, duplicate records, and inconsistent data.
- Used SQL for data extraction, filtering, aggregation, and workforce-level analysis to generate meaningful HR insights.
- Performed Exploratory Data Analysis (EDA) to identify workforce patterns and factors associated with employee attrition.
- Developed an interactive Power BI dashboard to monitor employee count, attrition rate, average salary, and department-wise workforce trends.
- Generated data-driven insights supporting employee retention, workforce planning, and HR decision-making.

Airport Operational Data Analysis

SQL | Python | Pandas | Matplotlib | Seaborn

- Performed data cleaning, exploratory data analysis, and data wrangling on flight scheduling and operational datasets.
- Developed SQL queries to analyze flight schedules, operational patterns, and potential bottlenecks.
- Created Python-based visualizations to identify trends and patterns across operational data.
- Translated analytical findings into actionable insights for improving flight scheduling and operational efficiency.

Spam Detection System

Python | NLP | Scikit-Learn | TF-IDF | Logistic Regression

- Developed an NLP-based text classification pipeline to classify messages as spam or legitimate.
- Applied TF-IDF vectorization to convert unstructured text into numerical feature representations.
- Implemented Logistic Regression for text classification and evaluated model performance using standard classification metrics.
- Applied model tuning and validation techniques to improve classification performance.

Audio Classification System

Python | Librosa | Scikit-Learn | Matplotlib

- Developed an end-to-end machine learning pipeline for audio feature extraction and classification.
- Extracted Mel-Frequency Cepstral Coefficients (MFCCs) from audio files to create machine-learning-ready feature representations.
- Trained and evaluated classification models for multi-class audio categorization.
- Used Python-based visualization and analysis to understand audio features and model performance.

EDUCATION

Master of Computer Applications (MCA)

Kamla Nehru Institute of Technology (KNIT), Sultanpur | 2020 – 2022 | CGPA: 7.72 / 10

Core Coursework: Machine Learning, Neural Networks, Artificial Intelligence, Database Management Systems, Cloud Computing, Advanced Python

CERTIFICATIONS

Data Science with Generative AI Program — NSDC Certified | PW Skills | Issued: November 11, 2025 | Credential ID: 7d2018c0-0b33-437c-8537-3695908b0be6

Generative AI for All Program | PW Skills & Microsoft | Issued: January 14, 2026 | Credential ID: 5ca3ad9c-1124-4293-ac6b-1377d14c46aa

Masterclass on Excel for Beginners: Your First Step into Data Analytics | PW Skills | Issued: July 13, 2025 | Credential ID: d3eafff9-78e4-47e5-8f48-b6efd79b6784

Implementation Training | Keka HR | Issued: September 2023
